OVERVIEW OF INDIAN RUBBER PRODUCTS INDUSTRY INCLUDING AUTO TYRES AND TUBE PRODUCTS

PREFACE:

India is the sixth largest producer of natural rubber down from the 3rd position, second largest consumer of natural rubber, fourth largest consumer of all kinds of rubber and world's largest producer of reclaimed rubber.

Indian rubber industry is basically divided into two sectors - tyre and non-tyre sector. The tyre sector produces all types of auto tyres, conventional as well as radial tyres. The non-tyre sector comprises the large, medium scale, small scale and tiny units. it produces high technology and sophisticated industrial products like automobile rubber parts, conveyor and transmission belts, cycle tyres and tubes, erasers, feeding bottle nipples, floor coverings and mats, gaskets, washers, seals, hot water bottles, ice bags, other hygienic rubber products, reclaimed rubber, rubber contraceptives, rubber gloves, aprons, rubber tubes, pipes and hoses, rubber plates, sheets, auto tyres – tubes & flaps etc. the rubber industry in India is a sunrise industry and has a huge potential to increase its rubber consumption from the present 1.16 kgs per capita to over 3 kgs per capita within the next decade. India stands 4th in terms of all rubber consumption with China, USA and Japan are taking the top three places respectively. Germany, South Korea and France are the other countries placed 5th, 6th and 7th respectively. The growth of rubber industry in India has been spectacular in the last two decades where the domestic consumption has grown by nearly 8% while exports have grown at nearly 20% cagr. The Indian rubber products have carved a niche for itself in terms of its quality perception, delivery and services.

The Indian rubber products have been exported to over 90 countries in the world incl. advanced countries like Europe, North America, Japan & Australia. Rubber Product industry in India has evolved over the last 4 decades to manufacture technologically-advanced rubber products. The industry comprises small and large rubber growers, synthetic and reclaimed rubber producers, tyre and non-tyre product manufacturers/exporters. The Rubber Industry is highly labour and energy intensive. Rubber Industry generates maximum employment on per unit of capital invested. The Indian Rubber Industry comprises about 450/500 large / medium scale units and nearly 6000 Small and Tiny units. Their growth in India and exports are to even advance countries against world competition. Indian Products have indeed created a respectable BRAND INDIA image. It generates direct & indirect employment opportunities for about 70 Lakh People involved in Plantation, Manufacturing Activities, Other Stakeholders (Processing, Raw Material Manufactures, Distributors of Products, Service Providers and others.

List of Major Products covered under the Panel:

a] Rubber products panel (non tyres sectors)

Following major products are covered under the rubber products panel of CAPEXIL

- automotive components
- bicycle tubes
- bicycle tyres
- conveyor, transmission, v belts
- floor coverings & mats
- gaskets, washers & seals
- hoses
- latex, dipped & medical including contraceptives
- reclaim rubber & waste pairings & scrap
- rubber cots & aprons
- rubber products n.e.s.
- rubber sheets
- synthetic rubber

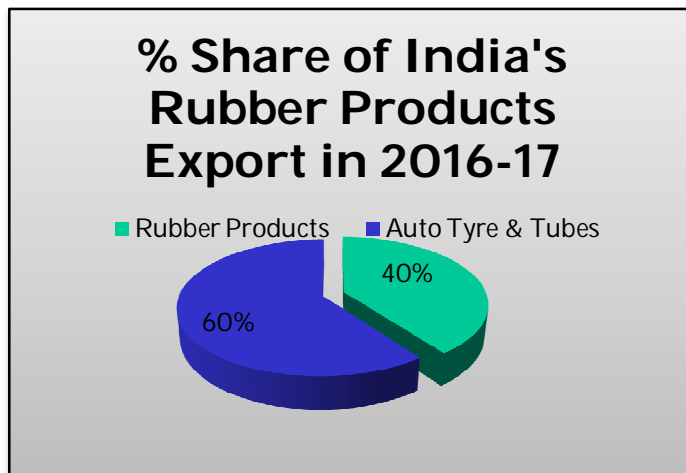

b] Auto tyres & tubes panel (tyres sectors)

Following major products are covered under the rubber products panel of CAPEXIL

- auto tubes
- auto tyres
- tyre flaps

Export Performance of Panel Products:

INDIA'S EXPORT	2016-17	2017-18*
RUBBER PRODUCTS	1014.37	1086.552
AUTO TYRE AND TUBE	1530.92	1790.37

VALUE IN USD MILLION

EXPORTS OF AUTO TYRES & TUBES AND RUBBER PRODUCTS FROM INDIA OVER THE LAST 5 YEARS

INDIAN RUBBER PRODUCTS EXPORTS - STRENGTHS

- 1st in natural rubber productivity.
- 2nd largest in natural rubber consumption.
- 6th largest producer of natural rubber.
- 4th largest global rubber consumer.
- Huge scope for rubber consumption in India. Presently the per capita consumption in India is 1.16 kg, in china 5 kg. & in developed nations about 6 to 12 kgs.
- Fast emerging as global automotive hub especially for small cars.
- Tyre industry contributes 3% of manufacturing GDP and 0.5% of the entire GDP of the nation

- Being capital intensive industry, the tyre sector saw Rs. 36000 crores investments for expansion in last year.
- India- a certified manufacturer of quality rubber products as our exports have been growing at more than 20% yoy for more than 20 years.
- Availability of technologists, largest amongst rubber producing and consuming nations.
- Export of Indian rubber products has grown over 20% cagr for the past decade. Exports of auto tyres & tubes from India have grown over cagr 21% for the last 10 years.
- With an extensive plantation sector, indigenous availability of raw materials and a growing small car automobile hub, India is a major player in the global rubber industry.
- The non-tyre sector comprises over 6700 large, medium scale, small scale and tiny units. It produces high technology and sophisticated industrial products. The SME accounts for over 40% of production of rubber goods in the non-tyre sector.
- Rubber product industry in India has evolved over the last 4 decades to manufacture technologically-advanced rubber products. The industry comprises small and large rubber growers, synthetic and reclaimed rubber producers, tyre and non-tyre product manufacturers/exporters.
- The Indian rubber products have been exported to over 90 countries in the world incl. Advanced countries like Europe, north America, Japan & Australia
- The rubber industry is highly labour and energy intensive. The Indian rubber industry comprises about 450/500 large / medium scale units and nearly 6000 small and tiny units. Their growth in India and exports are to even advanced countries against world competition. Indian products have indeed created a respectable brand India image.

INDIAN RUBBER INDUSTRY – AN OVERVIEW

Industry Turnover (Est.)	Rs. 95,000 Crore
- Tyre Sector (Est.)	Rs. 53,000 Crore
- Non Tyre Sector (Est.)	Rs. 42,000 Crore
Total Employment (Est.)	70 Lakh
- Plantation / Growers	10 Lakh

- Non Tyre Sector (Direct & Indirect)	5 Lakh
- Tyre Sector (Direct & Indirect)	28 Lakh
- Other Stakeholders (Processing, Raw Material Manufactures, Distributors of Products, Service Providers and others)	27 Lakh
Global Ranking in Total Rubber Consumption	4 th
Global Ranking in Natural Rubber Production	6 th

FUTURE GROWTH PROSPECTS OF RUBBER MANUFACTURED PRODUCTS - ROAD AHEAD:

- *Easy to achieve export growth of more than 30% year on year in spite of world competition once the constraints are addressed. Indian rubber industry has the proven capability of manufacturing the right quality of products which are accepted globally*
- *We have technical & skilled manpower and entrepreneurs to ensure the growth of rubber products industry.*
- *Per capita consumption of rubber is only 1.16 kg. In India vis-à-vis a global average of 3.12 kg.*
- *In the year 1980, total rubber consumption of china was similar to India. Today they are 6 times more than India. We must study the success of china model & learn from them.*
- *Even if we target to reach per capita consumption of 2 kgs our compounded average growth rate shall be 18% per annum.*
- *Easy to achieve as 60% of the rubber products are used in the automotive industry and with a growth witnessed by the Indian automotive industry for domestic as well as exports rubber industry is poised for a similar growth.*
- *With an extensive plantation sector, indigenous availability of raw materials and a growing small car automobile hub, India is a major player in the global rubber industry.*
- *Technical & skilled manpower & entrepreneurs to ensure the growth of rubber products industry.*
- *We must upgrade our technology to improve productivity & quality standards. For this, a technology up-gradation fund of at least Rs. 1000/- crores must be drawn up on soft interest terms.*

- *RSDC must be given boost in training & upgrading skill levels on urgent basis to ensure good technical & trained manpower. The RSDC is further developing this aspect on a war-footing.*
- *Encourage research & development. Organizations like IRMRA to develop prototypes of products having global demand & transfer this knowhow to industry on royalty basis to make them sustainable.*
- *Exporters play a very important role in improving quality, are innovative to meet world standards and develop products that would be required to fuel India's growth.*
- *The rubber industry can address India's concerns e.g. 1) water conservation in making inexpensive rubber dams 2) pillow tanks for storage of water 3) snake bite protectors 4) import substitution etc.*
- *To establish energy intensive industries, solar plants for captive consumption*
- *Establish "brand India" like the IT sector for quality of rubber and rubber products made in India for global consumption.*
- *The national policy on rubber is the urgent need for the all-round growth of all stake holders in rubber under a development commissioner for rubber products*
- *A bold approach to take India from 4th largest of all rubbers to the 2nd by the year 2025.*
- *Since a major quantum of raw material inputs for the manufacture of rubber products are from the petroleum sector, it is important that a representative from ministry of petroleum/chemicals is included in the committee to guide and formulate an effective policy.*
- *The defence departments import a large quantum of rubber products. Import substitution must be encouraged with active involvement of research institutions like IRMRA, RRI, IITS with an active incentive policy.*
- *Employment potential to increase to 7.48 Lacs in 2025*
- *Setting up manufacturing clusters or industrial parks where already mixing centers are created and testing facilities are made available. All such units in the clusters should be green units. Setting up manufacturing clusters or industrial parks for rubber products*
- *We must identify 10 top thrust rubber products and concentrate to give special attention to these products as having good potential for domestic consumption and exports. The top 10 products are:*
 - *Rubber sheets*
 - *Conveyor, transmission, v belts*
 - *Reclaim rubber & waste pairings & scrap*
 - *Automotive components*
 - *Latex, dipped & medical including contraceptives*
 - *Hoses*

- Gaskets, washers & seals
 - Floor covering & mats
 - Bicycle tyres & bicycle tubes
 - Tyre retread/camel back
- Export growth is anticipated to grow over 30% to touch an export target of us \$ 8.0 billion by 2025.
- We can transform Indian rubber industry to a world rubber product sourcing hub similar to it industry in order to keep the brand India image alive. The rubber products manufacturing industry is highly labor intensive and should be given priority/ incentives for its development.
- An office of development commissioner for the rubber products manufacturing industry must be established to monitor the growth on a regular basis. The development commissioner should be at list in the rank of additional secretary to monitor implementation of the schemes for this sector.
- To reduce transaction cost, MEIS should be directly credited to exporters' account which would avoid humongous paper works & procedures.
- Special attention must be paid for imports of substitution items especially for the defence sector.

CHALLENGES & MAJOR EXPORT CONSTRAINTS - CONCERNS FOR THE GROWTH OF RUBBER MANUFACTURED PRODUCTS:

- Non-availability of natural rubber: we produce about 7, 00,000 tons of nr while we require 1.20 million tons for home consumption. Therefore, we are required to import the deficit at high import duties.
- Import duty & inverted duty structure. Imports of increasing finished rubber products into India. Importing of raw materials used for rubber products manufacturing attract higher import duty than finished products. This inverted duty structure is causing manufacturers to become importers of finished products.

IMPORT DUTY ON FINISHED RUBBER PRODUCTS

Sl. No.	Item	Import Duty			
		India	China	Sri Lanka	Bangladesh
1	Compounded rubber, unvulcanised	5 - 10%	8%	Up to 15%	12%
2	Plates, sheets, strip, rods and profile shapes of vulcanized rubber	7.5 - 10%	8 %	15%	25%
3	Tubes, pipes and hoses	6 - 10%	10 - 10.5%	15%	12 - 25 %
4	Conveyor or transmission belts or belting of vulcanized rubber	10%	8 - 10 %	15%	5 - 25 %

5	Articles of vulcanized rubber other than hard rubber	10%	8 - 18%	0 - 30%	5 - 25%
6	Rubber Rice De-husking Rolls	0%	Up to 80%	15%	Up to 20%

IMPORT DUTY ON RAW MATERIALS

Item	Import Duty			
	India	China	Sri Lanka	Bangladesh
Natural Rubber (Dry)	25%/ Rs.30/- per Kg. whichever is lower	10	15	12
Natural Rubber (Latex)	70%	10	15	NA
SBR / PBR/ NBR/ EPDM / Chloroprene	10%	7.5	0	5
Rubber Chemicals	10%	6.5	0	5
Butyl	5%	7.5	0	5
Silicon & FKM	7.50%	6.5	0	5
Zinc Oxide	10%	5.5	0	5
PPT Silica Filler	10%	9	0	0
Carbon Black	5%	5.5	0	5
Titanium Dioxide	10%	6.5	0	5
Magnesium Oxide	5%	3	0	5
Process Oils	12%	16	0	12

Moreover, the Indian rubber products manufacturing industry is very heavily taxed as most of its raw materials are petro-chemical based manufactured by very large multinationals, many of which are monopolistic in nature. Imports of its raw materials are subjected to peak rate of taxes while natural rubber is being subjected to bounden duties of 25% on dry rubber and 70% on its latex rubber whereas finished products are imported at lower duties.

Thus, the inverted duty structure is playing havoc with its growth even though the rubber products manufacturing industry generates amongst the highest employment per unit capital invested. The authorities have turned a blind eye to the issues being raised time and again with the authorities.

- Carbon black – an important input for manufacturing rubber products placed on restricted list, under 8(c) safeguard duty and anti-dumping duty.
- Futures trading in rubber may be banned as price realization purpose is not served.

- *Setting up manufacturing clusters or industrial parks for rubber products*
- *FTA's & PTA's have not served its purpose as all countries have a favorable trade balance against India.*
- *Definition of SME unit should be fixed and investment limit must be revised upwards to the extent of USD 10 million for SSI (INR 70 crores) while for medium scale units to the extent of USD 50 million (INR 350 crores) especially for the export intensive SMEs exporting 30% of their production. This will help upgrading their technology to meet international standards.*
- *Imports have registered a 100% increase in the last 3 years mainly of sub-standard goods. Only goods meeting BIS standards should be permitted.*
- *Import of non-technical goods which can be easily manufactured in India has increased substantially due to prevailing inverted duty structure*
- *15% of the exporters make up 85% of the total exports from our country. This core group of 15% should be clearly identified to offer special facilitation & fast track clearances in the DGFT, customs, GST & other trade facilitators to address their needs on an urgent basis.*
- *Shipping companies to charge cost based charges as it adds to transaction costs, dg shipping should be appointed with regulatory powers. Shipping companies should charge for import cargo for only those charges as declared in bill of lading.*
- *Drawback rates should factor in surcharges & duties to offset the high cost of fuel, electricity, CST & other taxes without value cap. All duty paid imports of natural rubber should also be factored in while calculating duty drawback rate on export of finished rubber products to make it more relevant/effective.*
- *Second hand machinery should be allowed to import at 0% custom duty for up gradation of technology at soft rates of interest.*
- *Many rubber products being replaced by cheap plastic products which are not environment friendly and they are toxic and hazardous in nature.*
- *Labour laws to be made exporters' friendly to encourage exporters to take commitments without fear of facing labor disputes and costs.*
- *Development commissioner for rubber industry*
- *Credit facilities at international rate*
- *Port restriction: restriction on import of natural rubber through only NHAVA SHEVA & Chennai port, higher import duty on natural rubber & latex as well as consideration of MSP for rubber are significant constraints for growth of Indian rubber products industry & its export prospect.*

- *Inspection of imported natural rubber should be stopped*
- *Sectors like balloon, rice-dehusking rollers fast disappearing from manufacturing horizon.*
- *Countries like Indonesia, Philippines, Malaysia, Vietnam, etc. Gearing up to manufacture of rubber products, which are traditionally exporting nr.*

Steps taken by other rubber producing nations

Malaysia	<i>Largest Latex Rubber Product Manufacturer created a brand with support of government and now diversifying to solid rubber product.</i>
Sri Lanka	<i>One of the tiniest rubber producing nations in the world has drafted a National Policy on Rubber in February 2014. They are attracting Indian companies to set up a rubber product manufacturing units in Sri Lanka</i>
Thailand	<i>Tied up with China and many Chinese companies are setting up plants in Thailand for the ease in getting synthetic rubber. Aiming to be a net rubber consumer from being a net rubber exporter.</i>
China	<i>Government support in setting up huge modern plant for manufacture of synthetic rubber and rubber chemicals</i>
Vietnam	<i>With a focused approach, surpassed India as 4th Natural Rubber Product Producer and diversified to manufacturing largest producer of rubber footwear globally. Laos and Cambodia are fast gaining in NR production.</i>
Indonesia	<i>Has diversified from plantations to rubber product manufacturing. Indonesia is inviting Indian technocrats and entrepreneurs to set up rubber product manufacturing units, due to lack of technology.</i>

- *With regard to drawback, there are around 6500 SME units in the industry which can't give consumption data to justify the correct amount of DBK duty against export of their products. Hence, to compete globally, taxes & duties must be refunded on the basis of SION norms as per the EXIM handbook as they are vetted norms. This will facilitate for neutralization of taxes & duties. State level duties & taxes are also to be included in DBK calculation.*

Conclusion / summary:

- *Once the concerns as mentioned above are addressed, we feel there is tremendous potential for growth in exports and rubber products from the present 20% cagr to 30 to 35 % in spite of the world competition. We have technology and skilled manpower to sustain such growth.*
- *The per capita consumption of rubber is 1.16 kg as of now against a global average of 3.12 kgs. With such increase in consumption, the nr growers must gear up their production and ensure quality which must be supplied at prices prevailing in the world.*

- *The growth in the domestic and export market can be easily achieved as India is fast becoming a hub for production of automobiles specially the small cars.*
- *If these issues would be addressed properly, India can become no. 2 in all rubber consumption from its present position of no. 4 within a decade.*
- *National policy on rubber should provide the necessary vision and guide the industry for actions to be taken by various stake-holders including the government, rubber board, CAPEXIL AIRIA, ATMA, planters, manufacturers, importers, exporters etc. For benefit of each segment resulting in propelling the entire sector to a growth rate it is capable of.*
- *Make India one of the largest consumer and producer of raw material and finished rubber products for domestic as well as exports.*
- *Exports can be more competitive on marginal costs when the domestic industry is strong. For these various hurdles like inverted duty structure, multiple un-refunded taxes and high transaction costs must be addressed.*
- *To curb imports of substandard goods, we must impose safeguard duties or impose non-tariff barriers without asking for data as the micro and small industries are fragmented and impossible to collect such data.*
- *Create a brand India synonymous with rubber and rubber products transforming the rubber industry into a global hub for sourcing, similar to the Indian IT industry.*
- *The rubber manufactured products industry is a multiple raw material input and multiple process industry.*
- *The major inputs for manufacture of rubber products are natural rubber, various grades of synthetic rubber, reclaimed rubber, carbon black, zinc oxide, rubber chemicals, processing aids, processing oils, fillers, fabrics, steel chord etc.*
- *These inputs go through multiple stages of processing like raw material testing and approvals, mixing, calendaring/ extrusions, mouldings, vulcanizations, inspection, packing and logistics and shipping.*
- *All these processes are carried out after proper R&D and development of various stages in the production chain.*
- *In the technical goods sector, natural rubber forms only 15 to 20% of the total rubber matrix while rest is made up of various other inputs as listed above while in the tyre sector it forms nearly 30-35%.*
- *The rubber manufacturing industry is highly labour intensive in terms of per unit of capital invested & generating maximum amount of job / employment opportunities. The rubber industry*

i.e. Entire rubber products value chain (non tyres & tyres sector) directly & indirectly employs 70 lac employees by generating enormous employment opportunity up-stream and down-stream.

- *Encourage relocation of industries from the developed countries with their machinery and technology with a buyback of at least 50% of the production which would make the unit feasible at the outset. This would boost exports and promote our pm's vision of make in India.*
- *Exporters play a very important role in improving quality, are innovative to meet world standards and develop products that would be required to fuel India's growth.*
- *The rubber industry can address India's concerns e.g. I) water conservation in making inexpensive rubber dams, ii) pillow tanks for storage of water, iii) snake bite protectors, iv) import substitution etc.*
- *To establish energy intensive industries, solar plants for captive consumption*
- *Critical to retain and escalate our position as a rubber consuming nation of up to 5 kgs per capita in next 10 yrs.*
- *Establish "brand India" like the IT sector for quality of rubber and rubber products made in India for global consumption.*
- *The national policy on rubber is the urgent need for the all-round growth of all stake holders in rubber under a development commissioner for rubber products*
- *Last but not the least the government must trust the industry and the industrialists to facilitate the realization of this vision.*

ITALIA

Ease of Doing Business in Italy *2018*

Preface

Italy officially the Italian Republic is a unitary parliamentary republic in Europe. Located in the heart of the Mediterranean Sea, Italy shares open land borders with France, Switzerland, Austria, Slovenia, San Marino and Vatican City. Italy covers an area of 301,338 km² and has a largely temperate seasonal and Mediterranean climate. With around 61 million inhabitants it is the fourth most populous EU member state.

Since classical times, ancient Phoenicians, Carthaginians and Greeks established settlements in the south of Italy, with Etruscans and Celts inhabiting the centre and the north of Italy respectively and various ancient Italian tribes and Italic peoples dispersed throughout the Italian peninsula and insular Italy. The Italic tribe known as the Latins formed the Roman Kingdom, which eventually became a republic that conquered and assimilated its neighbours. Ultimately the Roman Empire emerged as the dominant power in the Mediterranean basin and became the leading cultural, political and religious centre of Western civilization.

Today, Italy has the third largest nominal GDP in the Euro zone and the eighth largest in the world. As advanced economy the country has the sixth-largest worldwide national wealth and it is ranked third for its central bank gold reserve. Italy has a very high level of human development and it is sixth in the world for life expectancy. The country plays a prominent role in regional and global economic, military, cultural, and diplomatic affairs, and it is both a regional power and a great power. Italy is a founding and leading member of the European Union and the member of numerous international institutions, including the UN, NATO, the OECD, the OSCE, the WTO, the G7, G20, the Union for the Mediterranean, the Council of Europe, Uniting for Consensus and many more. As a reflection of its cultural wealth, Italy is home to 53 World Heritage Sites, the most in the world, and is the fifth most visited country.

Demographic Profile:

Population: 62,137,802 (July 2017 est.)

Population growth rate: 0.19% (2017 est.)

Age structure: 0-14 years: 13.65%; 15-24 years: 9.66%; 25-54 years: 42.16%; 55-64 years: 12.99%; 65 years and over: 21.53%

Literacy: 99.2%

Official Language:

Major cities: Rome (Capital), Milan, Naples, Turin, Palermo, Bergamo

Economic Indicators of Italy

Currency: Euro (EUR)

Inflation rate: 1.41% (2017)

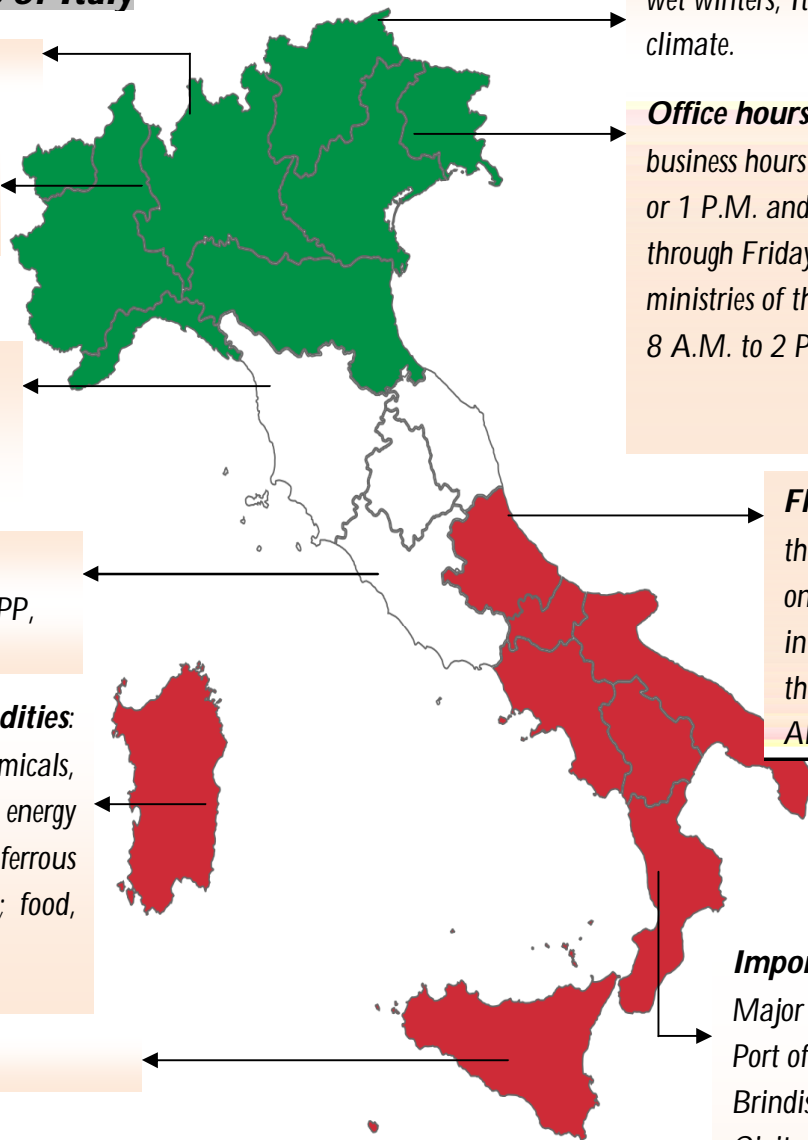

GDP: \$1.850 trillion (nominal, 2016), \$2.234 trillion (PPP, 2016)

GDP per capita: \$30,507 (nominal, 2016), \$36,833 (PPP, 2016)

Top 10 Import commodities:

Engineering-products, chemicals, transport equipment, energy products, minerals and nonferrous metals, textiles and clothing; food, beverages, tobacco

Import Rank: 9/134

Climate: With its hot, dry summers and cool, wet winters, Italy experiences a Mediterranean climate.

Office hours and timings: The usual Italian business hours are from 8 or 9 A.M. to Noon or 1 P.M. and from 3 to 6 or 7 P.M., Monday through Friday. Working hours for the various ministries of the government are normally from 8 A.M. to 2 P.M. without intermission.

Flight connectivity: From India there are two direct flights to Italy on a regular basis. National and international airlines that provide the service are: Air India and Alitalia

Important Ports (Sea and Air): Major Sea Ports are Port of Ancona, Port of Augusta, Port of Bari, Port of Brindisi, Port of Cagliari, and Port of Civitavecchia etc.

Major Air ports are Rome Fiumicino Airport, Milan Malpensa Airport, Venice Marco Polo Airport, Bergamo Airport, Sicily Catania Airport

Italy visa regulations

Business Visa:

Documents to be attached with Visa application:

1. Printout of Online Visa application form with uploaded photo.
2. Passport
3. Old passport and other nationality passport, if any.
4. Residence proof (More than 2 year's residence) or duly filled Fax form for non-residents or residents for less than two years

5. Letter of invitation from the Indian company specifying the nature of the visits, dates of the first visit planned, personal, passport and designation details of the applicant. Indian company has to specify its field of activity/business and has to mention its turnover of last financial year (scanned or faxed copy)

6. Letter of assignment by the foreign company specifying the nature of the visits, dates of the first visit planned, personal and passport details of the applicant as well as his designation within the company. Foreign company has to specify its field of activity/business and has to mention the turnover of last financial year (scanned or faxed copy).

7. All pages of the documentation submitted should be self-attested by the applicant.

8. Application and supporting documents should be submitted in duplicate.

9. Air Pilots applying for business visa to pilot planes in India should also submit clearance of the Ministry of Civil Aviation of India.

Applicants are advised to attach Certificate of Incorporation/Registration of the Indian as well as Italian Company (along with translated version of Italian) with their visa application, in case they are applying for a Business or Employment Visa.

Doing Business with Italy

Italy has a diversified industrial economy: the Northern regions are the industrial “engines” for the Italian economy. The main sectors are: food, textiles, machinery, iron and steel, clothing, footwear and ceramics. The Southern Regions, on the contrary, are much less prosperous and there is a clear economic gap between north and south, where the economy is based on small enterprises mainly agricultural and manufacturing, and the tourism sector (the south of Italy is incredibly beautiful). There is high unemployment, especially among women and young people.

The main exports of the south are engineering products, food, especially olive oil, wine, beverages, textiles and clothing, production machinery, motor vehicles, transport equipment, chemicals; minerals and nonferrous metals.

Reasons to choose Italy for business

1. A country that ranks among the world’s top economies and markets

Italy is the 3rd largest economy of the Euro zone and the 8th largest in the world, with a GDP of more than 2.1 trillion dollars, bigger than India or Russia. The domestic market offers many opportunities, with a population of more than 60 million and a per capita GDP of 36,000 dollars. The net wealth of Italian households is 8 times their disposable income (a higher ratio than US, Germany and Canada) and their indebtedness remain relatively low (82% of disposable income).

2. Strategic logistic hub

Italy represents a **strategic gateway to 500 million consumers** across the European Union and to **270 million** in northern Africa and the Middle East, and is **the main thoroughfare linking southern Europe to central and Eastern Europe**. Transport networks include **6,800 km of motorways**; **926 km of high-speed rail** with a top speed of over 300 km/h (190 mph), in addition to nearly 200 km under construction; **strategic ports for maritime freight and transshipment** along the Italian coast and islands.

3. Key world player in manufacturing and international trade

For over 30 years, Italy has been the **2nd largest manufacturing economy in Europe** after Germany, and the 6th – 7th **top world manufacturer**. Italian manufacturing **trade surplus is the 5th amongst G-20 countries**, exclusive of energy and mining, with a value of **96 billion Euros in 2014**. Italy holds leadership positions for trade surplus in 935 products out of 5,117 marketed goods (the most detailed breakdown of world trade by industry): **1st in 235 products, 2nd in 377 products and 3rd in 323 products**.

4. Competitive and skilled workforce

Italian **hourly labour costs are below the Euro zone average**: they are only 82% compared to the cost in France and 90% to Germany. **More than 20 Italian universities** are ranked in the top 500 academic institutions in the world, with **about 300,000 graduates per year**.

5. Tax measures and incentives to improve competitiveness

Tax credit schemes support companies to improve their competitiveness: 25% tax credit for **private investments in R&D** (50% for projects with universities or research centers), 15% tax credit for **investments in machinery and capital goods**. Employing **researchers in technical and scientific fields** also attracts tax credits. Further public incentives support **new investments in manufacturing and R&D**, especially in southern Regions.

6. Ongoing reforms: pro-business and pro-growth

A fast and comprehensive reform strategy is in place to build a more friendly business climate, **simplifying** and adapting bureaucracy, improving **education and justice**. Many of these reforms will make Italy **a more attractive economy to invest in**, such as new **labour legislation**, more flexibility to conclude tax agreements with the tax **authorities**, simplified procedures to access and exploit **oil and gas resources**, new financial tools for Real Estate, dedicated business courts to resolve disputes **involving foreign investors**.

7. Open to foreign investment: right place, right time

Strong performance of Multinational companies: industrial foreign affiliates employ 11% of total workers, produce more than 20% of domestic turnover, and export 26% of national exported goods. The presence of foreign affiliates is significantly higher in **high-tech sectors, high-level services, and among the largest companies**. According to the **FDI Confidence Index, Italy ranks 12th overall in 2015**, up from 20th in 2014. Thanks to recent regulatory reform, there is much greater flexibility in setting up a new business for start-ups: **Italy now precedes Germany in the 'starting a business' ranking**. In 2014, Italy had the **highest growth rate** among European countries of **inward Greenfield FDI projects** (+31%).

Italian Economy

The economy of Italy is the 3rd-largest national economy in the euro zone, the 8th-largest by nominal GDP in the world, and the 12th-largest by GDP (PPP). The country, that has a major advanced economy, is a founding member of the European Union, the Euro zone, the OECD, the G7 and the G20. Italy is the eighth largest exporter in the world with \$514 billion exported in 2016.

The economy of Italy is based on capitalism, which means that privately-owned organizations determine which products they will produce without strict government regulation.

This country has a diverse economy that revolves around several industries. Italy is well known for its business, agriculture, and luxury automobile sectors. In fact, it has the largest luxury goods market in Europe. Its other important industries include plastics, cement, iron and steel, shipbuilding, space and aircraft, textiles, fashion, and tourism.

Trade and Economic Relations between India and Italy

- India is Italy's fifth largest trading partner in the EU
- Balance of trade has been in India's favour since 1988.
- The volume of bilateral trade during 2016 has reached Euro 7516.90 million. The exports from India reached Euro 4238.89 million, with an increase of 5.94% in comparison to 2015.
- During 2016, India's imports from Italy stood at Euro 3278.01 million, registering a decrease of -2.17% compared to 2015. Thus, the balance of trade remains in India's favour (+960.88 million).
- The thrust areas of India's exports to Italy are iron, cast iron, steel and Ferro-alloys; organic basic chemicals, refined petroleum products; plants for the production of beverages; footwear; tanned leather, vehicles; fish, crustaceans and molluscs (processed and preserved); jewellery and related items; plastics in primary forms; dyes and pigments; parts and accessories for vehicles.

- Principal items of India's imports from Italy: machinery for textile, garment and leather industries (parts and accessories included); general purpose machinery; special purpose machinery; organic basic products; parts and accessories for vehicles; taps and valves; paper and cardboard; Machine tools for metal shaping; Ornamental and building stone, limestone, gypsum, chalk and slate; Tubes, pipes, hollow profiles and related accessories in steel (excluding cast steel); pumps and compressors; chemical products nes.
- Future Prospects for investment and trade are encouraging, as India is increasingly being seen as an emerging economic power in the world and an important economic partner in Asia, both in terms of trade and investment, and as an alternative to their original interest in Eastern Europe.
- Italy is India's fifth largest trading partner in the EU. Italy is the 13th largest foreign investor in India (0.70% of the cumulative total FDIs to India in the period April 2000 – June 2017). The European countries ahead of Italy in this respect are UK (that ranks 4th), Netherlands (5th), Germany (7th), Cyprus (8th), France (9th) and Spain (12th).
- The Indo-Italian bilateral trend has been constantly increasing at high rates till 2011 and only in 2012 and 2013 the trend has registered a negative growth, respectively by -16.67% and -2.62%, due to the global economic recession. The bilateral trade crossed for the first time 7 billion Euro in 2010 and 8 billion Euro in 2011. In 2015 the bilateral trade registered a positive growth by +2.12% over the previous year and in 2016 the growth was +2.25%.

Bilateral trade statistics for the past few years are given below:

Total Trade between India and Italy (Values in US \$ Million)

Total Trade	2012-13	2013-14	2014-15	2015-16	2016-17
	9,083.77	9,429.36	9,324.11	8,289.94	8,797.18

	4,711.27	4,156.61	4,231.81	4,072.22	3,895.01
Growth Rate %		-11.77	1.81	-3.77	-4.35

Industrial Free Trade Zones: Italy

The Italian government operates one free trade zone: the Free Port of Trieste (northeast of Italy) and the Free Port of Venice; Both these free zones are Control Type I, which means goods placed within the perimeter fence that is monitored by customs, are automatically under the free zone regime;

In Free-trade zones exporters are able to:

- 1) Defer duties and taxes for 180 days from the time that the goods leave the free-trade zone to enter another EU country
- 2) Transform goods free from any customs restraints
- 3) Obtain exemption from any duties on products coming from a third country.

The free-trade zone law also allows a company, of any nationality, to employ workers of the same nationality, under that country's labour laws and social security.

There are two free trade zones in Italy located in **Trieste** and **Venice**.

Italy also has numerous general warehouses that are located throughout Italy in all the port areas and cities. There are no limitations as to the type or origin of merchandise that can be stored in free trade zones, bonded or customs warehouses. The time limit for such storage is 5 years. Merchandise that deteriorates while in storage can be destroyed without the payment of a duty.

RECENT EVENTS

- **CAP INDIA Expo 2018, 22nd-24th March 2018, Mumbai**

Shri Suresh Prabhu, Hon'ble Minister of Commerce and Industry and Civil Aviation, Government of India addressing the Inaugural Session of the CAP INDIA Expo 2018, 22nd-24th March 2018, Mumbai

A brief report on the CAP India Expo 2018

CAPEXIL co organized the third edition of CAPINDIA 2018 under the aegis of the Department of Commerce & Industry, Government of India, and organized jointly by PLEXCONCIL, CHEMEXCIL & SHEFEXIL at the Bombay Exhibition Centre in Mumbai from 22nd to 24th March 2018. The initiative was to showcase the country's world-class manufacturing capabilities and capacities and aims to enhance exports of Indian manufactured products.

Hon'ble Union Minister for Commerce and Industry, Shri Suresh Prabhu inaugurated the event under the umbrella of the Department of Commerce and the Department of Chemicals and Petrochemicals. Over 95 manufactures/exporters of CAPEXIL, spread over 720 sq. meter have participated in the event under CAPEXIL Pavilion at CAPINDIA'2018 Exhibition showcasing hundreds of products, including Granite, Natural Stone, Marble, Minerals and Ores, Paints, Coating, Glassware, Furniture, Ceramic, Sanitary ware, Cement, Clinkers, Asbestos, Paper, Paper board, Stationary products, book Publishers and Printers amongst others.

CAPEXIL invited over 90 buyers from across the globe to attend the Buyer Seller Meets being organized as part of the Government's MAI Scheme to promote key export segments through platforms in order to foster closer trade collaboration between Indian manufacturers-exporters and target countries.

The show has received over 10,000 visitors comprising Domestic & Overseas buyers, International Agents and Distributors seeking market representation from Indian exporters, End Users seeking raw materials for captive consumption, Private Label Buyers, Merchant Exporters, Industrial and Marketing Consultants, Central and State Government Departments & Agencies and many more.

Speaking on the occasion, Hon'ble Commerce Minister said "As part of the country's policy initiatives on increasing India's Import-Export ratio it is essential to focus on substantially increase the contribution of foreign trade to the GDP. I would like to congratulate the four export promotion Councils – CAPEXIL, PLEXCONCIL, CHEMEXCIL & SHEFEXIL for organizing CAPINDIA 2018, one of the largest sourcing events for the multi products Industries. On behalf of our Ministry and the Government of India, he applaud the initiatives and efforts of the Export Promotion Councils as well

CAPEXIL

as urge the leading Indian companies in construction, mining, Books, Publication, Paper, Paper Board and Packaging products exports to extend their whole-hearted support, participate at CAPINDIA 2018 and be a part of this collective effort.”

Stating that India adheres to environmental norms as per international standards, he said that no business was not environment-friendly could be carried out on a global scale. Mr. Prabhu further said, “Our forest is one of the richest in the world in terms of biodiversity. Indian industry needs to do far more in the mining sector. There is a need to spread the awareness across the industry that we would not be able to produce anything without mining. Mining is the basic ingredient which makes the industry work and it must be ensured that mining is undertaken by adhering to the highest environmental standards”.

Underlining the importance even of post-mining activities, the Minister said mining was necessary for sustenance, and that mining and downstream activities could create huge opportunities in the service sector as well.

Mr. Shyamal Misra, Joint Secretary, Ministry of Commerce & Industry, said, “Global trade and output are growing at their fastest rate since 2008 and we have to capitalize on these opportunities. According to the second volume of the Economic Survey for 2016-17, India's exports need to grow at 25% plus annually over the next five years for India to reach a 5% share in world trade. This can be achieved only through reforms in trade policy by diversifying exports, rationalizing tariffs and developing world class export infrastructure. Our constant endeavor is to increase our share of global trade and also use trade expansion as an effective instrument of economic growth and employment generation. The Government has placed great emphasis on diversification into new markets while carving out a greater niche in existing markets. CAPINDIA is a good step in this direction”.

Mr. R. Veeramani, President, CAPEXIL, briefed the media “CAPINDIA 2018 was significant as it is the first mega industry event followed by Union Budget FY2019 and the implementation of GST, which have a significant bearing on targeted exports in sync with the Government's vision for Year 2022. The export target fixed for CAPEXIL products is US\$ 16.45 billion for the year 2017-18 which marks a 9.6% growth in exports compared to US\$ 15.01bn in 2016-17. The construction and mining sectors are responsible for propelling India's overall development.

Panel-wise exports for CAPEXIL touched US\$ 16.12 billion during the period from April 2017 to February 2018 showing a growth of over 19% compared to corresponding period last year's corresponding figures of US\$ 13.52 billion. Exports of Construction & Mining products are significant and show potential for growth.

During CAPINDIA 2018, the CAPEXIL also organized Industry Seminar on 24th March 2018 for the Processed Mineral Products, Value added Other Minerals from India and Innovative Trends of Ceramic Industry in Morbi, Gujarat.

B2B Meetings are in progress at the CAP INDIA Expo 2018, 22nd-24th March, Mumbai

Training Programme on “Product Market Identification and Market Entry Strategy” 24th April 2018, Kolkata

Dr. Gautam Dutta, Professor, IIFT addressing the Training Programme on "Product Market Identification and Market Entry Strategy", 24th April 2018, Kolkata, organized by CAPEXIL and Export Promotion Council for EOUs and SEZs

A brief overview of the Training Programme

CAPEXIL in association with Export Promotion Council for EOUs & SEZs organized a Training Programme on “ Product Market Identification and Market Entry Strategy” on 24th April 2018 at EEPC Conference Hall Kolkata.

The programme was designed keeping in view the free trade regime and economic reforms as initiated by Govt. of India as well as the impetus given to international trade, accelerate growth rate of export under the ‘Make in India’ regime. The programme primarily focused on making exporters aware of the strategies associated to identify a new market and how to enter the market by using advanced tools.

To illustrate the issue we had Dr. Gautam Dutta, Professor IIFT as the key note speaker. Dr. Dutta is an expert in Marketing Management, Technology Innovation Management, Entrepreneurship, Small Business Development and in Internal Marketing. The event was also graced by Mr. S.K. Ghosh, Past National Chairman and Chairman of Ceramics and Allied Products including Refractories Panel, CAPEXIL, Mr. C.R. Bhattacharjee, Regional Chairman, CAPEXIL, Mr. T.K. Bhattacharya, ED, CAPEXIL and Dr. Sabyasachi Ghosh, Regional Director, Export Promotion Council for EOUs & SEZs.

The programme was attended by approximately 30 exporters. The attendees gave a very positive feedback about the session. A simplified way of explaining the important issue of Product market identification and market entry strategies turned out to be really helpful to all of the delegates.

Key takeaways:

Dr. Dutta explained 7 easy steps to identify right market and the strategies to be followed to enter the same

Step 1:

Find out the RCA (Revealed Comparative Advantage) Value which shows the strength of the product. By following the website www.tradegroup.com the RCA value can easily be identified. The revealed comparative advantage is an index used in international economics for calculating the relative advantage or disadvantage of a certain country in a certain class of goods or services as evidenced by trade flows.

Step 2:

Ways to select the correct market for the product. The country which has a relative growth rate in terms of the import of the product should be considered the right market.

Step 3:

Short listing the country by using Shift Share method

Step 4:

To understand the competition existing in the shortlisted market and to have an idea about the completion one can visit www.tradegroup.org and chose the target country. This will show the share of all the countries who are exporting the product to the target market.

Step 5:

Identify the ease of exporting the product to the targeted market by following the below mentioned levels.

- www.doingbusiness.org →Ranking → Required Details pertaining to the chosen country

Step 6:

Understand the import barriers in terms of Import Duties. That means to find out if there is any Bilateral Trade agreement existing between the two countries for the product. APTIAD is the website one can visit to know about the treaties existing between two countries.

There are six different types of Bilateral Agreements:

- 1> Preferential Trade Agreement: A trade pact between countries that reduces tariffs for certain products to the countries who sign the agreement.
- 2> Free Trade Agreement: A Treaty between two or more countries to establish a free trade area where commerce in goods and services can be conducted across their common borders, without tariffs or hindrances but capital or labor may not move freely.
- 3> Comprehensive Economic Partnership Agreement: By signing this trade agreement the countries will enjoy a number free tariff lines as well as the qualification of people from a country will be regarded the same way in the other country.
- 4> Customs Union: A group of states that have agreed to charge the same import duties as each other and usually to allow free trade between themselves.
- 5> Customs Market: it is the combination of Comprehensive Economic Partnership Agreement Customs Union
- 6> Economic Union: A group of countries under this agreement will get the benefits of the above three trade agreements plus they will have the same currency

CAPEXIL Step 7:

Find out the tariff duty in the destination or target market by following the below mentioned levels

- Visit Trade Map Website → Other ITC Tool → Market Access Map

Mr. S.K. Ghosh, Past National Chairman and Chairman of Ceramics and Allied Products including Refractories Panel, CAPEXIL addressing the session

Session in progress

Distinguished dignitaries H.E. Mr. Sanjiv Ranjan, Ambassador of India to Argentina, Concurrently accredited to Paraguay & Uruguay address the audience at “Source India Exhibition –Argentina”, 28th Feb-2nd March 2018

Delegates attending the “Source India Exhibition – Argentina”, 28th Feb-2nd March 2018

New Services Introduced by CAPEXIL

Dear All,

CAPEXIL takes the opportunity to inform you that few new initiatives have been taken by the council to facilitate the members. Our council in its constant endeavor to promote and support the growth of Indian exporters (dealing with mineral and non mineral sector) has introduced three new services:

- a> We have created a new index on our website named "Trade Queries" which contains the list of importers from different countries dealing with the sectors associated to our esteemed council. The importers' lists have been given as those were received from the Indian Embassies of the respective countries.

- b> We have introduced the Membership Automation web application
 - We had sent automated invites to all the members on their email addresses with us. (In case anyone hasn't received the registration invite, please drop us an email with your company name, existing RCMC number and your email at itsupport@capexil.in, bkroy@capexil.in)
 - We would then send you a fresh registration invite
 - Once you accept the invite by clicking on the blue button in that email, your login credentials will be sent to you immediately.
 - You can catch a glimpse of how you can get started with the application after you've confirmed your registration with us.
 - We will be rolling out new pages and functionality the coming months and hope that you enjoy accessing our new software
 - We promise to continually expand our online content and keep you updated with the latest information on your membership at CAPEXIL

- c> We have reinitiated the periodic publication of CAPEXIL. The first edition of the CAPEXIL's Trade Outlook was uploaded on our website in March 2018. The second edition of the same will be uploaded in May. The E-Publication of each of the CAPEXIL's Trade Outlook consist a detailed report of one of the sixteen panels of the Council, overview of a foreign country, photographs and brief report of the domestic events and photographs of the international events and many more.

We hereby request you all to visit our official website www.capexil.org for further details. May we also request you to follow us on twitter and Facebook for regular updates and information pertaining to CAPEXIL . If you need any assistance regarding the above or would like convey your valuable suggestions to us please mail us at media@capexil.in

Circulars

Dear All,

We are pleased to inform you that we have created a new index on our website (www.capexil.org) captioned **“Trade Queries”** which contains the list of importers from different countries dealing with the sectors associated to our esteemed council. The importers’ lists have been given as those were received from the Indian Embassies of the respective countries. You can get the direct view of the importers’ lists by following the below mentioned links

Germany: <http://capexil.org/trade-queries-germany/>

Australia: <http://capexil.org/trade-queries-australia/>

Mexico: <http://capexil.org/trade-queries-mexico/>

Egypt: <http://capexil.org/trade-queries-egypt/>

China: <http://capexil.org/trade-queries-china/>

In recent past our esteemed council had sent few very important circulars to all the members. Appended is the list of the Circulars and the links which had already been circulated among the members.

Month	Subject	Link
May	The United States Generalized System of Preferences	http://capexil.org/the-united-states-generalized-system-of-preferences/
